# Pre-Announcement

## Better products with faster processes at reduced cost – three of the hottest topics of today

Speakers of **The 9th Annual European CMII Conference** will show their ways of working using the CMII principles

### About CMII

CMII – The Path to Integrated Process Excellence is used world-wide for **improving** and **harmonizing** business processes to **avoid cost** by reducing waste – a huge potential in most organizations. Any organization operating in the corrective action mode spending a high ratio of their resources on intervention will benefit from the CMII method.

### Why you should attend

This annual conference is your first source of information on CMII to learn:

- *How to improve the **quality** of requirements and documentation*
- *How to increase **transparency** of documented information*
- *How to improve **change process speed** and change impact analysis*
- *How to **protect knowledge** assets and prevent unauthorized changes*
- *How to establish **enterprise configuration and change management***
- *How to **harmonize** fragmented business processes*
- *How to **automate integrated** business processes*
- *How to **escape the corrective action mode***

### Who should attend

All professionals searching for first-hand information on how to improve business processes by using the CMII method should attend the CMII Europe 2010 and network with all speakers, partners and conference attendees.

### Call for speakers

Interested in speaking at the conference?  
Download the "Call for speakers" form at

<http://www.cmconference.com/callforspeakers.html>

Deadline for submission of your topic and abstract:  
Jan 31, 2010.

### Conference program

The main conference days will be Tuesday and Wednesday June 22 - 23, 2010 with user presentations from all types of industries. Pre-conference with a full day CMII Tutorial on Monday June 21, 2010.

CMII Course 9 (Refresher) starting immediately after the conference from June 24 - 25, 2010.

### About the organizer

GfKM provides awareness and **know-how for reduction of waste** to professionals in organizations and companies **by using the CMII method**. As the European representative of the CMII Research Institute USA, GfKM offers public and inhouse CMII Courses as well as consulting and certification services in Europe since 1999.
